**PRUIS, VANECK, AND ARNOLDSON-MEIR**

## **About This Report**

Your personalized Ancestral Influences Report analyzes your given name at birth and the name of the ancestors you choose to explore. Last names are an important part of your Numerology chart. They add letters and numbers to your Karmic Lesson and Hidden Passion charts and are the sole influence of your Spiritual Transit. This Transit is an important cycle reflecting your inner/spiritual evolution and that of your forebears. Your Ancestral Report provides a glimpse into characteristics you have inherited from those who came before you.

## **Ancestral Influences and Numerology; Your Ancestral 'DNA'**

Numerology is an ancient system for studying patterns and cycles. One such pattern demonstrates the enduring influence of the last name carried from generation to generation. A family name can remain unchanged since its origin. However, it sometimes loses or gains a letter or two or is altered entirely due to changing circumstances, such as immigration. These changes are reflected in your ancestor's evolutionary path. When their name changed, their lifestyle, environment and personality did as well. These traits are a component of your family's evolving ancestral "DNA" passed down through the years.

In most cultures, children adopt the last name of their father, and an in-depth analysis of this name can be quite revealing. However, to complete the ancestral picture, the mother's maiden name (on both sides of the family) is just as important. Looking back through both branches of your lineage will help you detect which side of the family you resemble most closely, and which traits you share. In short, you are at the end of a long line of predecessors, having inherited a wide range of characteristics. Your name and the names of your ancestors reveal centuries of accumulated energies and influences that are part of your makeup today.

## **Examining Names**

A name can be mined for sources of insight in a variety of ways. We consider the sum of the vowels, the sum of the consonants, and the sum of all letters combined. Additionally, each vowel and consonant is examined separately and in the order of appearance. Information is also gleaned from the absence

of certain numbers as well as those appearing most frequently. The Spiritual Transit cycles provide valuable information as well. Every ancestor who carried your last name went through the same Spiritual Transit cycles during the same ages you did.

The custom of a woman assuming her husband's name has a considerable impact on her personality and experiences. In doing so, she quite literally surrenders part of her identity and inner/spiritual path. This does not necessarily create discord and often affects the relationship positively. However, it is something to think about if you are contemplating marriage or divorce. Considering the effect a name imparts, a divorced woman might consider reclaiming her maiden name to recoup the part of her identity forfeited during the marriage. The decision to adopt a partner's name requires the same forethought for same sex marriages.

Let's move on to your reading.

---

## **Pruis**

### **Sources of Strength, Survival and Stamina**

*To understand your numerological "DNA" it is important to recognize that each aspect analyzed is focused on a specific facet of your ancestors' makeup. For example, in one chapter you might learn some of your ancestors likely lived on the darker fringes of society, while the next chapter suggests an innate desire for honor and justice motivated many of their choices. While this appears to be a contradiction, it probably isn't. Think of it as the "Robin Hood syndrome" where thievery and honor occupy the same heart; we all possess contradictions in our personality and the approaches we take to various issues.*

*This chapter centers on the dominant source of strength that helped your ancestors survive and prosper.*

Your last name suggests many of your forerunners survived and progressed, in part, by outwitting their enemies through diplomacy or manipulation. They were probably less inclined to pick up weapons than to use their wits and finesse. Some may have resorted to lying or cheating to survive (a variant of the negotiating skills associated with this influence).

Your Prais predecessors had strong, insightful intuition. While probably not the type of perception psychics depend on (although there may have been a few), they possessed an ability to accurately read the body language and facial expressions of others. This is a rare skill and should not be underrated.

---

### **Your Ancestor's Motivational Drive**

*This aspect describes what you ancestors were attracted to and motivated by.*

It is likely that many of your Prais ancestors became artists and artisans of some caliber. Their overwhelming motivation was the need to create and produce beautiful things that would enrich the lives of others. Many were quick-witted and verbally gifted. This probably helped them acquire financial support since throughout the ages artisans and artists have needed a patron's backing. However, a lack of follow through is also reflected in your ancestors' name, suggesting some may have died disillusioned or in reduced means.

---

## Dealing With Difficulty

*The following chapter reveals what can best be described as your ancestors' fortitude □ the ways they dealt with adversity, obstacles, illness, or poverty, or simply how they held fast against the tide of changing circumstances. These characteristics helped your ancestors overcome odds many could not, and were a determining factor in the choices they made and lifestyles they adopted.*

Jack, a natural ability to project authority and the drive to make it to the top at all costs may have placed some of your Pruis ancestors in high places. However, the numbers in this part of your chart suggest there was extreme polarity in your forebears' history. Although many pursued authority and power, others rebelled against it. It is likely there were few who chose the middle road.

---

## A Shared Passion Among Your Ancestors

*This section reveals a specific trait or dominant quality held by many of your predecessors. Although this report is built using the last name only, it reveals one area where a characteristic was likely shared almost universally among all with that surname, regardless of the first and middle names.*

Often intuitive and sometimes psychic, your ancestors were true survivors because they were able to "foresee" changes and adjust their lifestyles accordingly (as in escaping prior to overthrows or the arrival of a dictatorship). On the other hand, many were physically weak with low immune systems and sometimes deformities.

---

## Careers and Talents

*This section reflects attributes or a mindset that likely attracted your ancestors to a particular profession. Although other variables in the chart may have altered these influences and lead them to different choices, they probably had some interest in the trades and professions mentioned below. Let's take a quick look at the key qualities and attributes reflected in your predecessors' last name.*

Adventurous, eccentric, courageous. The most common professions among your ancestors with the last name Pruis: Soldiers, adventurers, animal handlers, entertainers.

---

### **Weakness, Challenge, Triumph**

*This chapter looks at a probable weakness that was relatively common among your ancestors. It would have been necessary for them to overcome this shortcoming to be successful in life. Keep in mind that this is a negative influence, and not every predecessor was affected by it. This aspect is often diminished or completely eliminated if a first or middle name balances it.*

You may want to ask yourself if you also have the propensity to become a rolling stone, a common trait among your ancestors with the last name Pruis.

They all shared a desire to experience and enjoy life with as little discipline and limitations as possible, which often dominated every other aspect of their lives. Their need for space and freedom motivated them in most endeavors, they wanted to try everything and go everywhere.

This need for freedom is often reflected in a lack of control and moderation, which in turn often led to overindulgence -- and even dependence upon -- alcohol, food, drugs, and sex.

For those of your ancestors who overcame this obstacle, establishing and maintaining lasting relationships was often the key.

---

### **How You Compare With Your Ancestors**

*This chapter looks at your name's numerological traits compared to those of your ancestors. Your ancestral influence rating is divided into four categories: Very High (16 through 20 points), High (11 through 15 points), Average (6 through 10 points), and Low (1 through 5 points). The ancestral influence rating shows how closely your traits resemble those of your ancestors. These results are neither good nor bad, but simply another way to identify your 'genetic code' similarities to each ancestor.*

Jack, your connection to this line of your ancestry is not very strong. On a scale

of 0 to 20, the compatibility rating with your Pruis forebears is between 6 and 10. Similarities exist but are not all that dominant in your personality. It is likely that your personal traits match a different branch of your family tree more closely. Keep in mind this comparison is a very small part of your makeup; your full name at birth and your date of birth hold much more weight and offer considerably more insight into who you are.

---

## Arnoldson Meir

### Sources of Strength, Survival and Stamina

*To understand your numerological "DNA" it is important to recognize that each aspect analyzed is focused on a specific facet of your ancestors' makeup. For example, in one chapter you might learn some of your ancestors likely lived on the darker fringes of society, while the next chapter suggests an innate desire for honor and justice motivated many of their choices. While this appears to be a contradiction, it probably isn't. Think of it as the "Robin Hood syndrome" where thievery and honor occupy the same heart; we all possess contradictions in our personality and the approaches we take to various issues.*

*This chapter centers on the dominant source of strength that helped your ancestors survive and prosper.*

The generations that came before you and shared the same last name Arnoldson Meir had one important asset in common; they were not afraid to put forth effort. Effort trumps any talent or ability, because, as they say, success is 99 percent sweat and 1 percent talent.

Many of your ancestors lived long and productive lives overcoming obstacles by the sheer strength of their will and the power of their stubborn resolve to keep up whatever effort it took.

On the down-side, there were probably quite a few angry and frustrated bullies among your ancestors who envied the apparent ease with which others managed to find reward and success, while they always had to work hard. This may have tempted some of your less restrained ancestors to abuse their physical and mental strength at the cost of those who were weaker.

---

### Your Ancestor's Motivational Drive

*This aspect describes what you ancestors were attracted to and motivated by.*

This part of your chart suggests many of your ancestors may have been aristocrats or were generally more sophisticated and educated than others in their communities. Although they might have been found in high places, many also had strong ties to the "common people" and were known to help the less fortunate.

However, the name suggests there could also be a dark thread running through this ancestral line, one of cruelty and greed. This tends to arise when people begin to consider themselves superior and disconnect from their community. You will very likely find both saints and sinners among your forerunners, and relatively few who lived mundane lives.

---

## **Dealing With Difficulty**

*The following chapter reveals what can best be described as your ancestors' fortitude □ the ways they dealt with adversity, obstacles, illness, or poverty, or simply how they held fast against the tide of changing circumstances. These characteristics helped your ancestors overcome odds many could not, and were a determining factor in the choices they made and lifestyles they adopted.*

Your forebears had their feet firmly planted in reality. They were grounded and careful, and more often than not managed to stay out of the line of fire without surrendering their convictions.

In general, they were a sturdy lot, physically strong and brave, and yet they often chose farming over soldiering. The strength that carried them through all kinds of troubles for many generations was founded in a powerful sense of belonging. This may sound strange, but an underlying feeling that "all is well and right," is reflected in the kind of self-confidence that can not be taught.

It is this confidence that impressed others often to the point that they would lay bare their souls, offer their trust, and rely on their advise.

---

## **A Shared Passion Among Your Ancestors**

*This section reveals a specific trait or dominant quality held by many of your predecessors. Although this report is built using the last name only, it reveals one area where a characteristic was likely shared almost universally among all with that surname, regardless of the first and middle names.*

Many of your ancestors were competitive, driven individuals. Some may have been quite aggressive.

---

## Careers and Talents

*This section reflects attributes or a mindset that likely attracted your ancestors to a particular profession. Although other variables in the chart may have altered these influences and lead them to different choices, they probably had some interest in the trades and professions mentioned below. Let's take a quick look at the key qualities and attributes reflected in your predecessors' last name.*

Secretive, intelligent, and controlling. Your Arnoldson Meir ancestors would have done well in law, business, teaching, and entertainment.

---

## Weakness, Challenge, Triumph

*This chapter looks at a probable weakness that was relatively common among your ancestors. It would have been necessary for them to overcome this shortcoming to be successful in life. Keep in mind that this is a negative influence, and not every predecessor was affected by it. This aspect is often diminished or completely eliminated if a first or middle name balances it.*

You may want to ask yourself if you also have the propensity to become a rolling stone, a common trait among your ancestors with the last name Arnoldson Meir.

They all shared a desire to experience and enjoy life with as little discipline and limitations as possible, which often dominated every other aspect of their lives. Their need for space and freedom motivated them in most endeavors, they wanted to try everything and go everywhere.

This need for freedom is often reflected in a lack of control and moderation, which in turn often led to overindulgence -- and even dependence upon -- alcohol, food, drugs, and sex.

For those of your ancestors who overcame this obstacle, establishing and maintaining lasting relationships was often the key.

---

## Vaneck

### Sources of Strength, Survival and Stamina

*To understand your numerological "DNA" it is important to recognize that each aspect analyzed is focused on a specific facet of your ancestors' makeup. For example, in one chapter you might learn some of your ancestors likely lived on the darker fringes of society, while the next chapter suggests an innate desire for honor and justice motivated many of their choices. While this appears to be a contradiction, it probably isn't. Think of it as the "Robin Hood syndrome" where thievery and honor occupy the same heart; we all possess contradictions in our personality and the approaches we take to various issues.*

*This chapter centers on the dominant source of strength that helped your ancestors survive and prosper.*

Your last name suggests many of your forerunners survived and progressed, in part, by outwitting their enemies through diplomacy or manipulation. They were probably less inclined to pick up weapons than to use their wits and finesse. Some may have resorted to lying or cheating to survive (a variant of the negotiating skills associated with this influence).

Your Vaneck predecessors had strong, insightful intuition. While probably not the type of perception psychics depend on (although there may have been a few), they possessed an ability to accurately read the body language and facial expressions of others. This is a rare skill and should not be underrated.

---

### Your Ancestor's Motivational Drive

*This aspect describes what you ancestors were attracted to and motivated by.*

Jack, many of your ancestors with the last name Vaneck were influential within their communities as healers, teachers, and protectors of the weak. They often sacrificed in order to help others. Many of them also chose politics or otherwise became important within their communities as advisors and leaders. Several of your ancestors became high level soldiers, perhaps even generals, as the motivation to climb the social and career ladder came natural to them. Not always, but in all likelihood, most of them preferred the role of defenders over that of aggressors, freedom fighters over conquerors, and saviors over oppressors.

---

## Dealing With Difficulty

*The following chapter reveals what can best be described as your ancestors' fortitude □ the ways they dealt with adversity, obstacles, illness, or poverty, or simply how they held fast against the tide of changing circumstances. These characteristics helped your ancestors overcome odds many could not, and were a determining factor in the choices they made and lifestyles they adopted.*

No matter which profession your ancestors chose, they generally had one thing in common; what they lacked in stability and common sense, they made up for in guts and glory. Clergy may have been deemed heretical at some point, and soldiers might have led a group of mutineers. This name suggests your Vaneck ancestors were often obstinate and disagreeable. This trait was probably counterproductive at times, but may have also provided the motivation to triumph over adversity.

---

## A Shared Passion Among Your Ancestors

*This section reveals a specific trait or dominant quality held by many of your predecessors. Although this report is built using the last name only, it reveals one area where a characteristic was likely shared almost universally among all with that surname, regardless of the first and middle names.*

Many of your ancestors were competitive, driven individuals. Some may have been quite aggressive.

---

## Careers and Talents

*This section reflects attributes or a mindset that likely attracted your ancestors to a particular profession. Although other variables in the chart may have altered these influences and lead them to different choices, they probably had some interest in the trades and professions mentioned below. Let's take a quick look at the key qualities and attributes reflected in your predecessors' last name.*

Protective, stable, and caring. The most common professions among your

Vaneck ancestors probably included farmers, woodworkers, politicians, counselors, and healers.

---

## **Weakness, Challenge, Triumph**

*This chapter looks at a probable weakness that was relatively common among your ancestors. It would have been necessary for them to overcome this shortcoming to be successful in life. Keep in mind that this is a negative influence, and not every predecessor was affected by it. This aspect is often diminished or completely eliminated if a first or middle name balances it.*

A lack of self-confidence, independence, and individuality, plagued many of your ancestors with the last name Vaneck, particularly in their earlier years. Many of them were either exceedingly aggressive, if not violent, while others were non-confrontational and seen by their peers as cowards -- it was either one or the other.

The lesson all your ancestors had to learn was to be courageous, stand on your own feet, and stand up for your rights. Chances are that you too have been forced to stand up for yourself and your rights when you were young, and that doing so was like a test of your personal strength. You have found yourself in situations in which you had to choose between standing up for what you thought was right versus giving in to another person's demands. Like many of your ancestors, you will have to learn to be firm and trust your judgment. Don't run with the crowd, be an individual. You share this challenge -- to some extent, depending on many other numbers in your chart -- with your ancestors. Therefore, you will have to experience much trial and error, sometimes exploding with bursts of aggression, other times being intimidated and letting frustration and anger build within you.

Some, if not most of your ancestors, eventually overcame this challenge once they found confidence and comfort in who they were, thereby overcoming the need to prove themselves through confrontation and aggression.

---

## **How You Compare With Your Ancestors**

*This chapter looks at your name's numerological traits compared to those of your ancestors. Your ancestral influence rating is divided into four categories: Very High (16 through 20 points), High (11 through 15 points), Average (6 through 10 points), and Low (1 through 5 points).
